

Portfolio Commentary

Large Cap Core Growth

Q4 | 2018

MARKET REVIEW

Stocks experienced a difficult market in the quarter, with all major domestic equity indices posting large negative returns that erased the year's prior positive to-date gains. In this sharp market reversal, growth stocks suffered the greatest declines, and large caps proved more defensive than small caps. The S&P 500[®] Index fell 13.52%, suffering losses across most of its sectors, led lower by energy (-23.78%), information technology (-17.34%), industrials (-17.27%), and consumer discretionary (-16.42%). Only the utilities sector (+1.36%) avoided losses in the quarter.

Broad volatility was escalated by mounting anxiety around slowing global growth, trade war tariffs, stumbling oil prices, and a flattening yield curve with the potential to invert, as investors seemed intent on finding growing signs of a possible U.S. recession. The selloff was a stark contrast to the investor enthusiasm in response to accelerating earnings and profits that had lifted growth stocks higher, albeit on a bumpier trajectory, for most of 2018.

PERFORMANCE

For the quarter, the Large Cap Core Growth Composite returned -14.07% (gross)/-14.24% (net), underperforming the -13.52% return of the S&P 500 Index. However, for the full year, the Composite return of -1.96% (gross)/-2.69% (net) outperformed the -4.38% Index return. Stock selection in the healthcare, energy, and communication services sectors and underweight positions in utilities, consumer staples, and real estate detracted from relative performance during the quarter. Stock selection in the financials, industrials, and consumer discretionary sectors and an underweight position in energy contributed positively to relative returns.

CME Group and McDonald's were among the strongest stock contributors to relative performance.

- Options and futures exchange operator CME Group benefited from higher trading volumes as investors increased hedging strategies in reaction to the market's intensified volatility. We maintained the position on the firm's solid fundamentals.
- Fast food company McDonald's rose on stronger-than-expected earnings and positive momentum in same-store sales comparisons. We continued to hold the stock on the firm's business strength, which we believe will continue to benefit from healthy U.S. employment, though we expect there may be a degree of short-term seasonality and minor remodeling disruptions in performance looking ahead.

Align Technology and Apple were among the largest stock detractors from relative performance.

- Shares of orthodontic device company Align Technology declined on weaker average prices for its Invisalign clear aligners, which began pressuring margins and revenue growth. The company attributed the softness to new promotions and currency fluctuations. We are closely monitoring how this pricing issue evolves.
- Despite strong earnings and revenue, technology leader Apple disappointed on lowered revenue guidance due to lackluster demand for its newest iPhones.

PORTFOLIO CHANGES

During the quarter, we bought PayPal Holdings, and sold Devon Energy and Packaging Corporation of America.

- Online payment firm PayPal Holdings is a new position we purchased based on the company's strong earnings and revenue driven by attractive gains in customer accounts and payment volumes, particularly on its peer-to-peer mobile payment app Venmo.
- We sold our position in oil exploration and production firm Devon Energy in early October when oil prices were starting to peak. The exit was part of an overall reduction in the portfolio's energy holdings, and we had a slightly unfavorable view of some of the company's oil field exposures that might ultimately result in asset divestment.
- We sold containerboard and corrugated product manufacturer Packaging Corporation of America, given the company's likely less favorable pricing dynamics due to the industry's increased capacity from competitor expansion. Volumes also faced negative pressures from the U.S.-China trade war.

PERFORMANCE ATTRIBUTION (%) AS OF 12/31/2018

OUTLOOK

Our outlook for growth stocks remains cautiously optimistic. The deteriorating risk sentiment that drove markets lower in the fourth quarter seemed to be stabilizing near year-end. Still, growth appears to be slowing. Housing, automotive sales, and inflation metrics have all begun to show small cracks, though not at levels that are necessarily indicative of any major problems—yet. Interest rates continue to normalize, and the cash boost gains from last year's corporate tax cuts are also fading. On the global growth front, Europe remains weak and faces major uncertainties such as Brexit, and China continues to decelerate, further exacerbated by U.S. trade policy. While we believe further market gains are likely to continue, at this late stage of the cycle, it is crucial to pay even closer attention to fundamentals and really hone in on the individual securities best positioned to buck the overall slowing growth trend.

It is not intended to be, and should not be construed as investment, legal, estate planning, or tax advice. Silvant Capital Management does not provide legal, estate planning, or tax advice. Investors are advised to consult with their investment professional about their specific financial needs and goals before making any investment decisions. Portfolio characteristics, sector analysis, and holdings exclude cash and may change at any time.

*eVestment Alliance (eA) is a manager-reported database on hundreds of investment managers and thousands of investment products covering a full range of asset classes, investment styles, and geographic concentrations. Based on manager input, eA independently constructs universes using qualitative and quantitative factors. The investment products are organized into peer groups and assessed on an ongoing basis to ensure the consistency of a product's attributes within a designated style classification. In addition, eA utilizes style analysis tools, performance analytics, and the review of a product's investment strategy narrative in the construction of wide-ranging universes that are both pure in style and consistent over time.

The eVestment Number of Portfolios represents the number of investment products included in the calculation of the median return for the given eVestment universe for the given time period. Individual investment managers may have more than one investment product included in the universe, so the number of observations will likely be greater than the actual number of investment managers represented.

HOLDINGS DISCLOSURE

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.

It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Growth Stocks:** Growth stocks are typically sensitive to market movements because their market prices tend to reflect future expectations. When it appears those expectations will not be met, the prices of growth stocks typically fall.

Silvant Capital Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Silvant has been independently verified for the period March 31, 2008 (the date of the Firm's founding) through December 31, 2017. A copy of the verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

- Silvant Capital Management LLC ("Silvant") is an SEC-registered investment adviser and is a wholly owned subsidiary of Virtus Partners, Inc., a wholly owned subsidiary of Virtus Investment Partners, Inc. ("Virtus"). Registration of an investment adviser does not imply any level of skill or training. Silvant manages assets on behalf of institutional and retail separate accounts and mutual funds. Silvant became an affiliate of Virtus effective June 1, 2017, when Virtus acquired RidgeWorth Capital Management LLC and RidgeWorth Investments ("RidgeWorth"). Silvant was created March 31, 2008, when all of the investment decision-makers associated with the growth equity investment strategies of RidgeWorth became employees of Silvant. The staff and decision making process remained intact and independent within Silvant. For composite reporting purposes, the Firm is defined as all equity portfolios managed by Silvant. Composite performance results are linked to performance history generated at RidgeWorth.
- The Large Cap Core Growth composite includes fully discretionary investment accounts and registered and unregistered mutual funds managed in accordance with the large cap core growth equity style, with the objective of investing in in stocks with a competitive advantage, strong profitability metrics, above average free cash flow, above average operating margins and positive price trends. Under normal circumstances, Large Cap Core Growth Portfolios will have at least 80% of their assets invested in common stocks and other U.S. traded equity securities of Mid to large cap companies. U.S. traded equity securities may include American Depository Receipts ("ADR's"). Silvant considers large cap companies to be companies with market capitalizations similar to those of companies in the S&P 500® Index and the Russell 1000 Growth Index. Silvant will seek out securities it believes have strong business fundamentals, such as revenue growth, improving cash flows, increasing margins and positive earnings trends. The gross of fee return for the mutual funds is calculated by adding back the fund's published total operating expense ratio to the net of fee mutual fund performance. A complete description of the composite is available upon request.
- The Large Cap Core Growth composite includes the performance of the equity portion of balanced accounts. Cash returns have been allocated using a predetermined cash allocation mix approach. Such "carve-outs" represent the following percentages of the total market value of the composite: 1.2% at December 31, 2008, and less than 1% at and December 31, 2009. Beginning January 1, 2010, all equity segments are managed with their own cash balance.
- The benchmark for the Large Cap Core Growth composite is the S&P 500® Index, an unmanaged index of 500 selected common large capitalization stocks (most of which are listed on the New York Stock Exchange) that is often used as a measure of the U.S. stock market. The index is calculated on a total-return basis with dividends reinvested. Index returns do not reflect the deduction of any fees or expenses.
- The three-year annualized standard deviations for the composite and the benchmark index are calculated using monthly returns.
- Valuations and returns are computed and stated in U.S. Dollars.
- Beginning March 31, 2008, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 10% or greater of portfolio assets. The policy was suspended effective November 1, 2015.
- The dispersion of annual returns is measured by the equal-weighted standard deviation of portfolio returns represented within the composite for the full year. Partial year dispersion is measured by the equal-weighted standard deviation of portfolio returns represented in the composite for the partial year period. No dispersion is reported for periods with five or fewer portfolios (shown as N/A).
- Returns are calculated based on total return which (a) includes cash returns, realized and unrealized gains plus income; (b) utilizes trade date and accrual accounting; and (c) is after the deduction of actual trading fees and expenses. Portfolio returns are calculated utilizing daily valuation. Composite returns, calculated monthly, are the weighted average return of the underlying portfolios using beginning-of-period market values. Composite gross of fee returns do not reflect any deduction for investment advisory fees, custodial charges or other costs that a client might incur in connection with the management of an account. Composite net of fee performance is calculated assuming a fee of 0.75%, the highest fee for this type of investment account.
- The standard management fee schedule applicable to large cap growth equity accounts is as follows: 0.75% on the first \$10 million, 0.45% on the next \$40 million, and 0.25% on all over \$50 million. Minimum annual fee is \$10,000. Actual investment advisory fees incurred by clients may vary.
- This composite was created March 31, 2008, the inception date of Silvant, and continues the investment strategy of a composite originally created in 2001. The composite has performance history with an inception date of January 1, 1995.
- The minimum portfolio size for the Large Cap Core Growth composite is \$500,000. For further information, please refer to Form ADV Part 2.
- Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- A complete list and description of firm composites and performance results is available upon request.
- Past performance is not indicative of future results and no investment is guaranteed for return of principal and/or return on investments. Results will vary among accounts. All information provided and used in calculations is believed to be correct, but accuracy cannot be guaranteed. Please consult with a financial professional before investing.
