

Portfolio Commentary

Large Cap Growth

Q2 | 2019

MARKET REVIEW

U.S. growth stocks in general continued to march higher during the quarter, outperforming their value peers, led by large-cap securities. The Russell 1000[®] Growth Index climbed 4.64%. All sectors in the Index delivered positive performance except energy (-3.32%), with financials (+8.86%), materials (+7.96%), and information technology (+6.61%) delivering the strongest gains.

Stocks broadly continued to trade on fundamentals, which remained largely positive. Continued low inflation and a strong job market also helped to prop up valuations, despite moderately weaker broad economic data. Growing expectations for the Federal Reserve to ease U.S. interest rates helped investors shrug off trade tariff tensions and slowing global manufacturing data. While most major economies around the world appeared to be either flat or slightly contracting, the U.S. was still clearly in expansionary mode, without any major signs of imminent recession, although this growth has come off recent peaks and continues to exhibit classic signs of late-cycle softening.

PERFORMANCE

For the quarter, the Silvant Large Cap Growth Strategy Composite's return of 5.69% (gross)/5.49% (net) outperformed the Russell 1000 Growth Index's return of 4.64%. Stock selection in the information technology, industrials, and consumer staples sectors made the largest contributions to performance, while stock selection in the communication services and consumer discretionary sectors detracted.

Exact Sciences and Microsoft were the strongest stock contributors to performance.

- Molecular diagnostics company Exact Sciences' stock climbed on strong earnings and revenue driven by fast-growing adoption of Cologuard, its flagship noninvasive colorectal cancer screening tool. The firm has experienced impressive gains in both the volume of tests sold and the number of doctors offering it. We purchased the stock last quarter and added to the position this period as its key metrics continued to accelerate.
- Computer technology company Microsoft generated higher-than-expected earnings and revenue, driven by solid margin gains and continued impressive growth in its Azure cloud computing platform. We continue to hold the stock, which was the largest position in the portfolio at quarter-end. Although 2020 is likely to be an investment year for Microsoft, based on indications of a modest ramp-up in spending, we expect this well-managed company to be able to continue to beat analyst expectations with steady acceleration across key metrics.

Facebook and Agilent Technologies were the largest stock detractors from performance.

- The portfolio’s relative underweighting to Facebook hurt returns as the social media firm outperformed in the quarter on better-than-expected revenue. Investors also seemed to shrug off the company’s announced accrual of \$3 billion to cover anticipated expenses in connection with what is expected to be a record-breaking fine from U.S. regulators over privacy issues. While we continued to hold the stock, we are watchful of concerns around whether global usage gains are becoming unsustainable, as well as credibility issues on the way Facebook has handled consumers’ data.
- Medical research and laboratory instrument manufacturer Agilent Technologies fell on disappointing earnings and lowered forward-looking guidance. We maintained our position but are closely monitoring the company’s challenges in its small-molecule drug research segment and softening product demand from China.

PORTFOLIO CHANGES

We purchased Qualcomm and exited Cognex during the quarter.

- We bought Qualcomm on the announcement that it had settled its ongoing lawsuits with Apple. The company, which manufactures semiconductor and telecommunications equipment, is one of the dominant players in the 5G segment and should also benefit from Intel’s plans to exit the 5G smartphone modem business.
- We sold Cognex, producer of machine vision systems and barcode readers, on weakness in demand from both the consumer electronics and automotive industries for its products, which put a squeeze on the company’s margins. Even though the stock pulled back during the quarter, we still were able to lock in sizable gains from when we first purchased it.

OUTLOOK

We remain largely positive in our outlook. Earnings continue to decelerate, which may begin to weigh on investor sentiment. However, overall stock fundamentals and the primary tenets of continued U.S. economic expansion, although slowing, remain largely in place. This environment should continue to offer relatively attractive, though perhaps somewhat blander, return potential for growth stocks. To be sure, areas of caution remain. It continues to get harder for companies to beat their earnings expectations, especially after a decade of steady gains. It also remains difficult to assess how the most recent trade war rhetoric might ultimately play out given the unpredictable nature of the Trump administration. Corporate capital spending also remains light, and this will probably remain the case until there is some clarity that trade tariff concerns are behind us. Even with these overhangs though, we do not currently see a material risk of recession and continue to find solid investment potential in carefully selected growth securities.

*eVestment Alliance (eA) is a manager-reported database on hundreds of investment managers and thousands of investment products covering a full range of asset classes, investment styles, and geographic concentrations. Based on manager input, eA independently constructs universes using qualitative and quantitative factors. The investment products are organized into peer groups and assessed on an ongoing basis to ensure the consistency of a product's attributes within a designated style classification. In addition, eA utilizes style analysis tools, performance analytics, and the review of a product's investment strategy narrative in the construction of wide-ranging universes that are both pure in style and consistent over time.

The eVestment Number of Portfolios represents the number of investment products included in the calculation of the median return for the given eVestment universe for the given time period. Individual investment managers may have more than one investment product included in the universe, so the number of observations will likely be greater than the actual number of investment managers represented.

HOLDINGS DISCLOSURE

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.

It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Growth Stocks:** Growth stocks are typically sensitive to market movements because their market prices tend to reflect future expectations. When it appears those expectations will not be met, the prices of growth stocks typically fall.

Silvant Capital Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Silvant has been independently verified for the period March 31, 2008 (the date of the Firm's founding) through December 31, 2018. A copy of the verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

- Silvant Capital Management LLC ("Silvant") is an SEC-registered investment adviser and is a wholly owned subsidiary of Virtus Partners, Inc., a wholly owned subsidiary of Virtus Investment Partners, Inc. ("Virtus"). Registration of an investment adviser does not imply any level of skill or training. Silvant manages assets on behalf of institutional and retail separate accounts and mutual funds. Silvant became an affiliate of Virtus effective June 1, 2017, when Virtus acquired RidgeWorth Capital Management LLC and RidgeWorth Investments ("RidgeWorth"). Silvant was created March 31, 2008, when all of the investment decision-makers associated with the growth equity investment strategies of RidgeWorth became employees of Silvant. The staff and decision making process remained intact and independent within Silvant. For composite reporting purposes, the Firm is defined as all equity portfolios managed by Silvant. Composite performance results are linked to performance history generated at RidgeWorth.
- The Large Cap Growth Strategy composite includes fully discretionary separately managed investment accounts and registered and unregistered mutual funds managed in accordance with the large cap growth style, with the objective of investing in in stocks with a competitive advantage, strong profitability metrics, above average free cash flow, above average operating margins and positive price trends. Under normal circumstances, Large Cap Growth Portfolios will have at least 80% of their assets invested in common stocks and other U.S. traded equity securities of large cap companies. U.S. traded equity securities may include American Depository Receipts ("ADR's"). Silvant considers large cap companies to be companies with market capitalizations similar to those of companies in the Russell 1000 Growth Index. Silvant will seek out securities it believes have strong business fundamentals, such as revenue growth, improving cash flows, increasing margins and positive earnings trends. Prior to September 1, 2015, the gross of fee return for the mutual fund was calculated by adding back the fund's published total operating expense ratio to the net of fee mutual fund performance; we now use the gross of fee return of the underlying portfolio. A complete description of the composite is available on request.
- The Large Cap Growth Strategy composite includes the performance of the equity portion of balanced accounts. Cash returns have been allocated using a predetermined cash allocation mix approach. Such "carve-outs" represent the following percentages of the total market value of the composite: 5.8% on December 31, 2008, and less than 1% on December 31, 2009. Beginning January 1, 2010, all equity segments are managed with their own cash balance.
- The benchmark for the Large Cap Growth Strategy composite is the Russell 1000 Growth Index, which measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. Index returns do not reflect the deduction of any fees or expenses.
- The three-year annualized standard deviations for the composite and the benchmark index are calculated using monthly returns. The statistic was not calculated for the composite for December 31, 2008, and December 31, 2009, because 36 monthly returns are not available.
- Valuations and returns are computed and stated in U.S. Dollars.
- Beginning March 31, 2008, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 10% or greater of portfolio assets.
- The dispersion of annual returns is measured by the equal-weighted standard deviation of portfolio returns represented within the composite for the full year. Partial year dispersion is measured by the equal-weighted standard deviation of portfolio returns represented in the composite for the partial year period specified.
- The significant increase in the dispersion statistic for calendar year 2010 was attributable to significant outperformance in one of our comingled funds due to the receipt of proceeds from a class action lawsuit. Excluding this portfolio would reduce dispersion from 2.4 to 0.6 and would have no significant impact on composite performance.
- Returns are calculated based on total return which (a) includes cash returns, realized and unrealized gains plus income; (b) utilizes trade date and accrual accounting; and (c) is after the deduction of actual trading fees and expenses. Portfolio returns are calculated utilizing daily valuation. Composite returns, calculated monthly, are the weighted average return of the underlying portfolios using beginning-of-period market values. Composite gross of fee returns do not reflect any deduction for investment advisory fees, custodial charges or other costs that a client might incur in connection with the management of an account. Composite net of fee performance is calculated assuming a fee of 0.75%, the highest fee for this type of investment account.
- The management fee schedule applicable to large cap growth equity accounts is as follows: 0.75% on the first \$10 million, 0.45% on the next \$40 million, and 0.25% on all over \$50 million. The minimum annual fee is \$10,000. Actual investment advisory fees incurred by clients may vary.
- This composite was created March 31, 2008, the inception date of Silvant, and continues the investment strategy of a composite originally created in 2007. The composite has performance history with an inception date of April 1, 2007.
- The minimum portfolio size for the Large Cap Growth Strategy composite is \$1,000,000. For further information investment management fees, please refer to Form ADV Part 2.
- Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- A complete list and description of firm composites and performance results is available upon request.
- Past performance is not indicative of future results and no investment is guaranteed for return of principal and/or return on investments. Results will vary among accounts. All information provided and used in calculations is believed to be correct, but accuracy cannot be guaranteed. Please consult with a financial professional before investing.
