

Portfolio Commentary

Large Cap Core Growth

Q2 | 2020

MARKET REVIEW

Growth stocks led U.S. markets higher in the second quarter, rallying on an aggressive momentum rebound that marked the strongest broad quarterly returns in more than 20 years. Investors cheered massive government stimulus actions in response to the COVID-19 crisis, incremental improvements in economic conditions, and the start of phased state reopenings. There were also encouraging signs in virus treatments and potential vaccine developments. As the quarter wound down, however, the initial enthusiasm for risk assets was replaced by a more sobering tone as new virus cases and hospitalizations began to accelerate in southern and western states, pulling back on some of the equity gains.

The S&P 500[®] Index rose 20.54% in the quarter, with all sectors posting positive returns. The largest gains were in the consumer discretionary (+32.86%), information technology (+30.53%), and energy (+30.51%) sectors, while the smallest gains were in the utilities (+2.73%) and consumer staples (+8.12%) sectors.

PERFORMANCE

The Silvant Large Cap Core Growth Strategy Composite returned 21.70%/21.49% (gross/net), outperforming the S&P 500 Index, which returned 20.54%. Stock selection in the financials, communication services, and information technology sectors, combined with underweight positions in the utilities and consumer staples sectors, added the most to performance. Stock selection in the consumer discretionary and industrials sectors and an underweight position in the energy sector weighed the most on returns.

Apple and Dexcom were the strongest stock contributors to relative performance in the quarter.

- Technology leader Apple outperformed on earnings and revenue strength. The company's service and wearables segments continued to experience impressive growth and expand their contributions to overall sales. Gains were also driven by recovering demand in China, a tailwind from work-at-home mandates for its iPad, Mac, and service centers, and a new cycle of iPhones expected before year end. We maintained our overweight position, given the firm's strong fundamentals and upbeat outlook.
- Medical device company Dexcom continued to be a top performer for the portfolio. The firm again reported market-beating revenues and earnings. It also overcame initial concerns about a potential business slowdown from lack of in-office doctor visits as the broad adoption of telemedicine helped it to achieve its largest new patient gains for its continuous glucose monitoring system—a game-changer in diabetes management. We held our position given the firm's strong technology and long runway for continued attractive growth gains.

CME Group and Walmart were the largest stock detractors from relative performance.

- Despite attractive revenue and earnings, options and futures exchange operator CME Group lagged on weakening volume expectations for its interest-rate derivatives, given the Federal Reserve’s signals that monetary easing efforts are apt to stay in place for some time. We continued to hold the stock based on its dominant derivatives-trading position and a favorable long-term growth outlook for the company.
- Low-cost retailer Walmart underperformed, even though it reported strong financial results, including attractive same-store sales and e-commerce growth. The company’s stock had performed relatively well in last quarter’s market sell-off, and investors preferred more discounted names in an effort to better participate in the quarter’s momentum rally.

PORTFOLIO CHANGES

Tyler Technologies was a new addition in the quarter, and we exited Willis Towers Watson.

- We purchased public sector software provider Tyler Technologies on its strong competitive position and “sticky” business model. The company appears well poised to capture additional market share as the COVID-19 crisis has exposed significant weaknesses in many state and local governments’ antiquated technologies.
- We sold risk management and insurance brokerage company Willis Towers Watson on the announcement that it would be acquired by rival Aon. We do not see much upside in the stock and wanted to use its proceeds to fund stronger investment ideas.

OUTLOOK

We expect volatility will continue to be the norm for the rest of the year. Overall, fundamentals remain challenged as the U.S. faces recession and significant levels of unemployment, though it is currently unclear how many of these job losses may be permanent and how many businesses may fail. The future course of the pandemic is also far from certain at this point, and the U.S. is entering a highly contentious election season. Yet from an equity perspective, it appears that markets have discounted quite a bit around these types of concerns, and we think investors should be somewhat cautious about getting ahead of themselves, as well as prepared for moments of market dislocation. This uncertain environment calls for careful stock selection and bottom-up analysis. We continue to find solid investment opportunities, and while volatility may be painful short term, we believe our portfolio remains well positioned to continue to reward investors over the long term.

It is not intended to be, and should not be construed as investment, legal, estate planning, or tax advice. Silvant Capital Management does not provide legal, estate planning, or tax advice. Investors are advised to consult with their investment professional about their specific financial needs and goals before making any investment decisions. Portfolio characteristics, sector analysis, and holdings exclude cash and may change at any time.

*eVestment Alliance (eA) is a manager-reported database on hundreds of investment managers and thousands of investment products covering a full range of asset classes, investment styles, and geographic concentrations. Based on manager input, eA independently constructs universes using qualitative and quantitative factors. The investment products are organized into peer groups and assessed on an ongoing basis to ensure the consistency of a product's attributes within a designated style classification. In addition, eA utilizes style analysis tools, performance analytics, and the review of a product's investment strategy narrative in the construction of wide-ranging universes that are both pure in style and consistent over time.

The eVestment Number of Portfolios represents the number of investment products included in the calculation of the median return for the given eVestment universe for the given time period. Individual investment managers may have more than one investment product included in the universe, so the number of observations will likely be greater than the actual number of investment managers represented.

HOLDINGS DISCLOSURE

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.

It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Growth Stocks:** Growth stocks are typically sensitive to market movements because their market prices tend to reflect future expectations. When it appears those expectations will not be met, the prices of growth stocks typically fall. **Market Volatility:** Local, regional, or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the portfolio and its investments, including hampering the ability of the portfolio manager(s) to invest the portfolio's assets as intended.

Silvant Capital Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Silvant has been independently verified for the period March 31, 2008 (the date of the Firm's founding) through December 31, 2019. A copy of the verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

- Silvant Capital Management LLC ("Silvant") is an SEC-registered investment adviser and is a wholly owned subsidiary of Virtus Partners, Inc., a wholly owned subsidiary of Virtus Investment Partners, Inc. ("Virtus"). Registration of an investment adviser does not imply any level of skill or training. Silvant manages assets on behalf of institutional and retail separate accounts and mutual funds. Silvant became an affiliate of Virtus effective June 1, 2017, when Virtus acquired RidgeWorth Capital Management LLC and RidgeWorth Investments ("RidgeWorth"). Silvant was created March 31, 2008, when all of the investment decision-makers associated with the growth equity investment strategies of RidgeWorth became employees of Silvant. The staff and decision making process remained intact and independent within Silvant. For composite reporting purposes, the Firm is defined as all equity portfolios managed by Silvant. Composite performance results are linked to performance history generated at RidgeWorth.
- The Large Cap Core Growth composite includes fully discretionary investment accounts managed in accordance with the large cap core growth equity style, with the objective of investing in in stocks with a competitive advantage, strong profitability metrics, above average free cash flow, above average operating margins and positive price trends. Under normal circumstances, Large Cap Core Growth Portfolios will have at least 80% of their assets invested in common stocks and other U.S. traded equity securities of Mid to large cap companies. U.S. traded equity securities may include American Depository Receipts ("ADR's"). Silvant considers large cap companies to be companies with market capitalizations similar to those of companies in the S&P 500® Index and the Russell 1000® Growth Index. Silvant will seek out securities it believes have strong business fundamentals, such as revenue growth, improving cash flows, increasing margins and positive earnings trends. The gross of fee return for the mutual funds is calculated by adding back the fund's published total operating expense ratio to the net of fee mutual fund performance. A complete description of the composite is available upon request.
- The Large Cap Core Growth composite includes the performance of the equity portion of balanced accounts. Cash returns have been allocated using a predetermined cash allocation mix approach. Such "carve-outs" represent the following percentages of the total market value of the composite: 1.2% as of December 31, 2008, and less than 1% as of December 31, 2009. Beginning January 1, 2010, all equity segments are managed with their own cash balance.
- The benchmark for the Large Cap Core Growth composite is the S&P 500® Index, an unmanaged index of 500 selected common large capitalization stocks (most of which are listed on the New York Stock Exchange) that is often used as a measure of the U.S. stock market. The index is calculated on a total-return basis with dividends reinvested. Index returns do not reflect the deduction of any fees or expenses.
- The three-year annualized standard deviations for the composite and the benchmark index are calculated using monthly returns.
- Valuations and returns are computed and stated in U.S. Dollars.
- Beginning March 31, 2008, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 10% or greater of portfolio assets. The policy was suspended effective November 1, 2015.
- The dispersion of annual returns is measured by the equal-weighted standard deviation of portfolio returns represented within the composite for the full year. Partial year dispersion is measured by the equal-weighted standard deviation of portfolio returns represented in the composite for the partial year period. No dispersion is reported for periods with five or fewer portfolios (shown as N/A).
- Returns are calculated based on total return which (a) includes cash returns, realized and unrealized gains plus income; (b) utilizes trade date and accrual accounting; and (c) is after the deduction of actual trading fees and expenses. Portfolio returns are calculated utilizing daily valuation. Composite returns, calculated monthly, are the weighted average return of the underlying portfolios using beginning-of-period market values. Composite gross of fee returns do not reflect any deduction for investment advisory fees, custodial charges or other costs that a client might incur in connection with the management of an account. Composite net of fee performance is calculated assuming a fee of 0.75%, the highest fee for this type of investment account.
- The standard management fee schedule applicable to large cap growth equity accounts is as follows: 0.75% on the first \$10 million, 0.45% on the next \$40 million, and 0.25% on all over \$50 million. Minimum annual fee is \$10,000. Actual investment advisory fees incurred by clients may vary.
- This composite was created March 31, 2008, the inception date of Silvant, and continues the investment strategy of a composite originally created in 2001. The composite has performance history with an inception date of January 1, 1995.
- The minimum portfolio size for the Large Cap Core Growth composite is \$500,000. For further information, please refer to Form ADV Part 2.
- Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- A complete list and description of firm composites and performance results is available upon request.
- Past performance is not indicative of future results and no investment is guaranteed for return of principal and/or return on investments. Results will vary among accounts. All information provided and used in calculations is believed to be correct, but accuracy cannot be guaranteed. Please consult with a financial professional before investing.
